Morrisville State College offers 12 bachelor degrees and a wide variety of associate degrees and options.

Considered to be one of the most technologically advanced colleges in the nation for its ThinkPad University program and wireless technology initiative, the college recently became the first in the nation to comprehensively replace landlines in residence halls with individual cellular phones.

Morrisville State College was also chosen as one of the top five colleges in the nation for campus activities by Campus Activities magazine.

Professional and Transfer Opportunities

A variety of career opportunities are available for graduates of the automotive and diesel technology programs. Diesel graduates are prepared for employment as diesel technicians, parts technicians, factory representatives, heavy equipment technicians, farm and industrial equipment technicians, service managers, electric power generation technicians and much more. Automotive graduates have a host of opportunities and may enter the job market as automotive technicians, service, parts, or facilities managers and sales or body specialists. Many graduates of the A.A.S. degree programs remain at Morrisville to earn a baccalaureate degree or transfer to other colleges and universities for additional training to become vocational or high school technology teachers, or to pursue advanced degrees in engineering and mechanics. Opportunities for graduates of the baccalaureate degree programs in automotive technology include managers or supervisors in the automotive industry or automotive technicians, service, parts, or facilities managers and sales or body specialists. Students who wish to begin further academic study are fully prepared to do so and may go on to earn additional automotive, engineering, or education degrees.

**Programs**

**Baccalaureate Degrees**
- Automotive Technology**
- Automotive Technology Management*

**Associate Degrees**
- Agricultural Engineering*
- Agricultural Mechanics*
- Automotive Service Specialist
- Automotive Technology
- Diesel Equipment Technology*
- Diesel Technology*

**Certificate Program**
- Automotive Mechanics

* ThinkPad University program
** ThinkPad University program in third and fourth years

Morrisville State College offers several unique and high-demand associate degree programs for students interested in pursuing careers in automotive and diesel technology and the only bachelor degrees in automotive technology east of the Mississippi. Graduates leave Morrisville with a wealth of hands-on and academic experiences designed to prepare them to become leaders in the transportation industry and to face challenges in today's global society. Students in some majors will take a variety of liberal arts and sciences courses as well as advanced courses in mathematics and business, while students in the A.O.S. and certificate programs will concentrate on a curriculum with a laboratory focus.

**Facilities**

Morrisville State College is committed to keeping students on the cutting edge of the transportation industry. Facilities include:

- 52,000-square-foot, $4.9 million automotive facility
- Vehicle diagnostic equipment, repair facilities and computer-networked classrooms
- New car showroom
- Nine state-of-the-art laboratories including chassis, electrical, emissions, engines, Ford ASSET (Automotive Student Service Educational Training), fuel diagnostics/driveability, performance and transmissions labs
- Chassis dynamometer room
- Small power equipment laboratory
- Power-train laboratory
- Tractor laboratory for farm machinery and heavy equipment
- Diesel fuel systems laboratory

At Morrisville, outstanding professors maintain professional certifications and contact in the field to assure that our programs are on the forefront of technological innovation. The college has long-standing relationships with industry leaders in the field, including Ford Motor Company and Caterpillar. In some programs, students are able to combine an internship element with their academic program. Internships broaden academic perspectives, provide professional experience, and enhance students' marketability in the industry.

As an IBM ThinkPad University, Morrisville State College has made a commitment to the integration of technology into the teaching and learning environment. Every student enrolled in an academic program which is designated a ThinkPad University program will use the IBM wireless-equipped laptop as an integral part of their academic experience.
