Keeping the Flu at Bay

Welcome back for the beginning of the spring semester. These first two months of winter often bring about a large flu outbreak. This is especially a concern for students, many of whom live in close quarters with one another. The single most effective way to protect yourself from acquiring or spreading viruses is to wash your hands frequently. It also wouldn't hurt to wear warm clothing to protect yourself from extreme cold weather since severe cold weather also compromises your immune system. If you develop flu symptoms such as fever, body aches (especially low back ache), runny nose, and/or fatigue, please go to the Student Health Center for an evaluation.

Snack bar operations manager, Bruce Coe, waits for customers at Quick Pic in STUAC.
