

Summary of outcomes for 2019/20 graduates from SUNY Morrisville

Prepared by Tara Shimer, Department of Workforce and Educational Development (X6390)

Following is the summary of where 2019/20 certified graduates* were employed or continued their education between their respective graduation dates and December 31, 2020. Associate and bachelor graduates for August 2019, December 2019, and May 2020 were included in our data collection.

A knowledge rate of 63.2% was achieved. Data was collected in accordance with standards of the National Association of Colleges and Employers (NACE). Outcomes were collected through multiple channels, with information reported directly from graduates in an at-graduation survey or in a subsequent follow-up survey distributed via email September 2020; reported from on-campus parties including faculty, administrative advisors, athletic coaches, on-campus employers, and school offices. Please take note that the 2019/2020 graduate outcome data and collection of the data, was significantly impacted from changes in the labor market and communication due to the COVID-19 global pandemic which is still in effect, this date April 15, 2021.

In addition to New York state, our 2019/20 graduates are working and studying in 8 other states and one foreign country.
