

## Mapping Network Drives for Laptops not on Domain

---

<u>Drive</u>	<u>Path</u>	<u>Description</u>
U	\\MYFILES\YOURUSERName\$	U Drive
W	\\MYWEBFILES\YourUserName\$	W Drive

**Open** File Explorer by pressing the Windows key  and 'E' at the same time. **Right-Click** on 'This PC' and **click** on Map Network Drive. This opens the 'Map Network Drive' window.

**Select** the letter of the drive to map from the drop down list next to 'Drive:'. **Type** the Path for the drive in the text box next to 'Folder:'

**Check** the box "Connect Using Different Credentials" and when asked for the username and password to connect, type in the domain (csntprod) before entering their campus username (as shown below). **You can also use the users campus email address, if the domain name doesn't work.**

## Commonly Used Network Drives

---

<u>Drive</u>	<u>Path</u>	<u>Description</u>
M	\\ENGERNT1\ <dept_name&gt;\$< td=""> <td>For members with a department only</td> </dept_name&gt;\$<>	For members with a department only
